

NYCO announces that its aerospace lubricants are qualified on Embraer E-Jets, E-Jets E2 & ERJ 145.

Paris, September 2022:

NYCO announces that its range of aerospace lubricants are now approved for use on the following Embraer commercial platforms: E-Jets, E-Jets E2 and ERJ145.

NYCO and Embraer have collaborated for many years now to offer more performant and affordable lubricants options available for use at the San Paulo plant and in-service. These new approvals conclude months of engineering work and substantiation from Embraer's team.

Paul Gallais, Director of Programs: "We are pleased with this achievement which enables Embraer's operators around the world to use NYCO as their direct one stop supply point for all their lubricants. Some of the qualified products are made out of the last generation of additives such as our new wheel bearing grease, NYCO GREASE GN 3058, which will reduce wear and corrosion issues in wheel bearings for years to come"
